

## Quality Environment and Safety Policy

In over 60 years of innovation and investments in Home & Building Automation sector, Quality, Occupational and Product Safety, Technological Innovation, respect and safeguard of the Environment have always been placed at the centre of CAME business model.

Over the years these fundamental values have enabled us to become a benchmark brand in supplying integrated solutions for the automation, control and security of residential, public and urban environments and today it is a synonymous with a responsible way of doing business.

We want to guarantee safety and comfort of our customer and for this reason, we are committed to allocating adequate human, technological, organizational and financial resources, so that planning, manufacturing, marketing and service activities are carried out according to the following key points:

### Prevention instead of correction

The respect for product requirements and specifications and the prevention of pollution and workers' health and safety risks are to be guaranteed via detailed, systematic analysis of industrial processes, to prevent any potential deviation that may impact market competitiveness, may not satisfy fully the customer or may cause damage to the environment and people.

### Respect for requirements and provisions

Compliance with laws in force, technical standards, freely defined rules and product specifications established on the basis of customer needs and expectations, is guaranteed by the application of the integrated management system, thanks to the commitment and involvement of all stakeholders.

### Continuous improvement

With the aim of guaranteeing customer satisfaction and safeguarding the environment and our workers, the company undertakes to apply process development and management criteria that ensure continuous improvement of our products and services, supporting the efficiency and effectiveness of the integrated management system, also through innovation, research, development and certification. Essential aspects are accident prevention, correct consumption of energy resources and raw materials, containment of waste production and search for new available technologies.

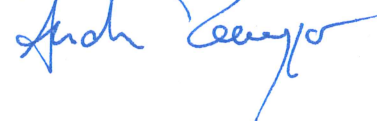

The performance excellence is known to be reached by empowering people at all levels, CAME S.p.A. undertakes to:

- **communicate** its corporate thinking through the publication of this Policy;
- **sensitize and involve** all internal staff, external collaborators and stakeholders;
- **promote the spread**, the understanding and the awareness of the importance of the "Quality - Environment - Safety" culture and of its responsibilities, through an adequate diffusion of the principles above-mentioned.

Following the principles outlined by the Management, CAME S.p.A. has, therefore, adopted an Integrated Quality - Environment - Safety Management System according to the UNI EN ISO 9001, UNI EN ISO 14001 and BS OHSAS 18001 international standards in compliance with the 231 organisational model.
